

# Assignment 3

Due Date: March 8, 2022 at 7:00 PM

## Overview

This assignment will be worth **1%** of your total grade.

## Specifications

For this assignment, you will need to have Node.js installed on your computer and be able to run a simple JavaScript file.

### Part 1: Install Node.js

To download Node.js you can navigate to: <https://nodejs.org/en/download/>  
For Command Line wizards, you can *brew install node* or use whatever package manager your OS uses. Node.js comes with npm so that is all that needs to be done!

Note: if you already have Node.js installed and would like to update, I found nvm to be helpful <https://github.com/creationix/nvm>  
Then you can pick a Node.js version to install i.e. *nvm install v8.1.3*

### Part 2: helloWorld.js

Now that Node.js has been installed on your computer, you will need to create a simple file called helloWorld.js that prints “Hello World” to the console. This should only be one line of code.

## Submission

Please submit the following on Blackboard:

- A screenshot of your current node, npm version, and the helloworld.js output (not the file) to show you have node installed
